Product Description

Process description:

After chilling in equalization chamber with forced air, the carcasses are separated in legs, shoulder butt, picnic shoulder, loin and side. The sides are sent to debones tables, where the belly is removed from side. After removal of the bone (rib), the skin is removed and refined. After that, is picked up one belly sheet and it is wrapped in transparent polyethylene film containing a plastic identification label within the pack. The packages are sent to secondary pack room, where are placed in cartons. The cartons are covered, an identification sticker label is applied and the cartons are sent to conventional frozen. After frozen, the cartons are sent to stock chamber whose temperature is lower than -20°, where remain until shipment.

The production date and expiry date must be stamped on both of identifications labels.
