| <p>Process description:</p> <p>After chilling in equalization chamber with forced air, the carcasses are separated in legs, shoulder butt, picnic shoulder, loin and side. The legs are sent to debone tables, where has the skin removed and refilled. The pork cutting fat comes from the loin. After that, it is packaged in transparent polyethylene bag containing a plastic identification label within the pack. The packages are sent to secondary pack room, where are placed in cartons until complete 20kg. The cartons are covered, an identifications sticker label is applied and the cartons are sent to conventional frozen. After frozen, the cartons are sent to stock chamber whose temperature is lower than -18º, where remain until shipment. The production date and expiry date must be stamped on both of identifications labels.</p> <p>Specifications of microbiological parameters:</p> <ul style="list-style-type: none"> - Count of Mesophiles: 5 x 10e5, ICMSF - 1974 - Total Coliforms: 5x10e3, ICMSF - 1974 - Coliforms a 45°C/g (Fecal coliforms): 1x10e4, RDC 12 de 02/01/2001 - Staphylococcus aureus: 3x10e3, ICMSF - 1974 - Salmonella spp.: Ausência em 25g, RDC 12 de 02/01/2001 <p>Specifications of physicochemical parameters and contaminants:</p> <ul style="list-style-type: none"> - Not applicable <p>Requisitos de identidade e qualidade:</p> <ul style="list-style-type: none"> - Bruise: Maximum 1% - Meat: Maximum 1% - Skin: Maximum 1% - Speckled: Maximum 1% - Product absent of strange materials. <p>Allergen:</p> <ul style="list-style-type: none"> - Not contains <p>Instructions for preparation and consume:</p> <ul style="list-style-type: none"> - This food if handled incorrectly and or consumed raw can cause health damage. - Keep refrigerated or frozen. - Defrost only in the refrigerator or microwave. - Keep raw product separate from other foods.
