Product Description

Process description:

After chilling in equalization chamber with forced air, the carcasses are separated in legs, shoulder butt, picnic shoulder, loin and side. The shoulders are sent to debone tables, where it has the skin removed, it is deboned and refilled. After that, is picked up one boneless shoulder and it is packaged in transparent polyethylene bag containing a plastic identification label within the pack. The packages are sent to secondary pack room, where are placed in cartons until complete 20kg. The cartons are covered, an identifications sticker label is applied and the cartons are sent to conventional frozen. After frozen, the cartons are sent to stock chamber whose temperature is lower than -20°, where remain until shipment. The production date and expiry date must be stamped on both of identifications labels.
